

Is your hearing loss
keeping you in isolation?

Dual opens the door to a whole new world.

People first

Dual is made by Oticon — the World Leader in Hearing Care since 1904. At Oticon, we believe that it takes more than technology and audiology to create the best hearing devices. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.

Step out into a world
of better hearing.

Even a mild hearing problem can cause you to retreat from the world around you. Everyday conversation becomes more of a challenge as natural speech and ordinary sounds are harder to perceive, making it difficult to understand what's going on.

To reunite you with family, friends and the things you enjoy most, try Dual — a revolutionary new hearing device that helps you hear the way nature intended.

You'll actually feel rejuvenated...like a brand new person, re-engaged with everyone in your world

to share more fully in discussions, events and personal experiences.

With Dual, the life that hearing loss took away is yours to experience again.

Finally, a hearing device you'll actually want to wear.

Groundbreaking in looks and performance.

Dual is a breakthrough hearing device that combines state-of-the-art hearing technology with cutting edge design. It will help you hear better and understand more spoken words in any listening environment, even with background noise present.

Dual is remarkably small, but packed with the technology you need to keep you connected to the sounds you want to hear. It's stylish and modern in appearance, with a unique triangular shape that comes in 14 attractive colors. You can make a tasteful (or bold) fashion statement to complement your natural hair or skin tone, or choose to keep Dual totally discreet and out of sight — for the ultimate in personalized hearing care.

Best of all, you'll like that Dual is completely automatic and easy to use. There are no buttons, no programs, no fiddling. Dual has the most advanced sound processing available in order to help you hear better.

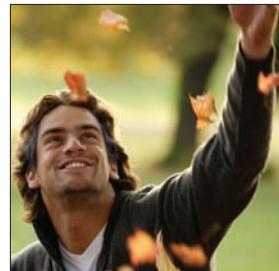

Better hearing in any listening situation.

Understand what others say in noisy rooms.

Dual is designed to help you hear better in complex listening environments where diverse sounds often compete with each other. You'll find it easier to participate in more conversations and understand what's being said.

Listen to life's sounds more naturally.

With its advanced "open fit" technology, Dual sounds very natural. It maximizes the use of your residual hearing, giving you a boost in those situations you need it most. You will quickly forget you are even wearing Dual.

Watch TV at the same volume as everyone else.

Dual enables you to view and understand television audio at a volume level that works for you, so you won't disturb others in the room. TV viewing can once again be enjoyed with the entire family.

Your new life starts now.

We encourage you to experience how Dual helps you regain a new sense of freedom and individuality by making your relationship with sound more natural... more meaningful... more comfortable.

Stylish in your hand, yet virtually invisible on your ear.
